

A simple everyday routine

On a second page, click on the **Table of Contents** link, then use the left menu to move between fair sections.

- Add or update products and prices before you start billing. Keep product status Active only for items currently available.
- For every paid sale, create a bill, check the total, then choose Save Bill, Save & Print or Save PDF based on what the customer needs.
- **Recon**
- For credit sales, always use Create Due Bill and record the customer's name and phone number. Collect payments promptly from Dues.
- Open F
- At the end of the day, review Dashboard and export your data regularly from Settings.
- Use Cr
- 
- The screenshot displays the SKANDHAS MASALA application interface. On the left, a sidebar menu contains icons and labels for 'Dashboard', 'Sales', 'Products', and 'Bills'. The 'Sales' option is currently selected. The main area of the app is titled 'Settings' and shows a 'Loading...' status. The app has a dark theme with orange accents.

Important data note

This is a frontend-only application: products, bills and settings are held in the browser's local storage, not on an online server. Do not clear browser site data without exporting first. Backups are especially important when changing browsers, computers or user profiles.

Invoice output

- [illegible]
